

With these three MOOCs, the EMBRACE project is helping shape the future of higher education by training educators in digital skills, promoting innovation in teaching, and encouraging sustainable learning practices. Whether you're just starting your digital journey or looking to deepen your competences, these flexible and engaging courses are designed with you in mind.

We're excited to announce that all three MOOCs will officially launch on May 21 during a special online event. Don't miss this opportunity to discover new tools, connect with educators across the globe, and be part of a transformative movement in education.

MOOCs of the EMBRACE Project

The EMBRACE project is all about empowering educators through accessible, flexible, and high-quality online learning. Using a modern MOOC (Massive Open Online Course) approach, it brings together interactive content, global collaboration, and cutting-edge teaching strategies. Designed with the ADDIEM model and aligned with the DigCompEdu framework, these courses support professional development in digital education—anytime, anywhere.

MOOC 1: Digipeda – Digital and Pedagogical Competences

This first course focuses on helping teachers and school leaders develop essential digital and pedagogical skills. Participants will learn how to create and use digital resources effectively, as well as apply student-centred teaching practices. It targets DigCompEdu's Competence Areas 2 and 4, ensuring a strong foundation in digital content creation and assessment.

MOOC 2: Active Pedagogies Using Digital Tools

The second MOOC dives into active learning strategies supported by technology. Educators will explore digital tools that enhance engagement and make learning more meaningful. It aligns with DigCompEdu's Areas 3 and 5, focusing on the use of digital tools for collaborative learning and empowering students in their learning journey.

MOOC 3: Professional Involvement and Promoting Learners' Digital Competence

This final course supports educators in taking a more active professional role while fostering their students' digital competences. It bridges the gap between education and the world of work, aligning with DigCompEdu's Areas 1 and 6.
